

Online Backup - The Best Solution for You!

Home Computer Users

- *Do you do some or all of your work from home?*
- *Do your kids have homework and project assignments on the PC?*
- *Do you have countless memories stored in pictures and files?*
- *Do you have your computer set up, just the way you like it where everything works perfect for you?*

Business and Corporate Users

- *Do you have employees or virtual workers?*
- *Do you travel with a laptop?*
- *Do you have bids, quotes, or other important information stored in your data files?*
- *Could you easily recover from one of many disasters that strike?*
- *Is your contact list and accounting data important to your business?*

If you answered yes to any of these questions, you should be backing up your data!

DATABarracks
secure online data back up

Ensuring Business Continuity - If you are a sales or operations manager with virtual employees, Online Backup Services are the perfect solution for you to be able to make sure your employees work and data are backed up in case of sudden tragedy, illness, theft, or termination. Our online backup service is also compliant with the security requirements of the HIPAA Act, which mandates that healthcare industry practitioners provide secure, encrypted off-site backup. Whether your backup of federally mandated or just good common sense, we are experts at ensuring your business continuity!

Ensuring Your Personal Life - You see, even personal computer users need a back up copy of their data. The "system recovery disk" that comes with your computer will not recover your personal files. What this means is that any work you have used your computer for since the day you bought it, is lost if disaster strikes. This includes: your emails, favorite places, financial records, research, kids pictures, homework, or your home business files. All of this important data can be gone forever if disaster strikes.

Whatever your computer uses, your data is important, and needs to have a routinely scheduled backup copy made. You can do this easily and cost effectively using our Online Backup Services! Not only do we provide you the most cutting edge back-up and data recovery system on the market, but our technical support is unmatched in the industry as well. We are confident that you will realize just how easy and valuable our service is when you try it that we offer a no questions asked, 30-Day Money Back Guarantee, and give you a free 15-day trial period!

Know that you are protected if:

- **Your Hard Drive crashes**
- **Your computer is stolen**
- **A virus corrupts your system**
- **You accidentally, permanently delete critical data**
- **Lightning strikes**
- **Or any other unforeseen disaster**

Just look at all the features. You will not find a better, easier, way to protect your data than SmartBackup! When disaster strikes, you will be back up and running at full force in no time at all!
